PROFILE OF SKILLS AND COMPETENCES

## ***Composition of the qualification***

The qualification module common to all candidates is **acting in a sustainable manner** (30 cr.). Those specialising as Nature Instructors within the Study Programme/Competence Area in Nature-based Services must take the **instruction in nature** module (20 cr.). Those specialising as Natural Resources Producers within the Study Programme/Competence Area in Nature-based Services must take the **nature-based production** module (20 cr.). Those specialising as Nature and Environmental Advisors within the Study Programme/Competence Area in Nature-based Services must take the **nature and environmental advice** module (20 cr.). The qualification includes optional modules that support vocational specialisation, such as **environmental status assessment, preparation of nature surveys, utilisation of renewable sources of energy, remediation and management of outdoor recreation routes, remediation and management of man-made environments, remediation and management of nature conservation areas, working in nature-based services, instruction of special groups in nature, providing wellness services with the aid of animals, instruction in manual skills and group empowerment and social participation**. Furthermore, it is possible to choose modules from other vocational, further and specialist qualifications. In addition, students on curricular (school-based) upper secondary VET programmes may also take qualification modules developed to meet the needs of the local world of work. The total scope of vocational qualification modules is 90 credits (scopes do not apply to competence-based qualification modules). In addition, students on curricular (school-based) upper secondary VET programmes must take 20 credits of core subjects and 10 credits of free-choice qualification modules. Students may individually choose modules to expand the qualification.

## ***Vocational skills and competences required for completion of the qualification***

Nature Instructors who have completed the qualification shall:

- be able to work with different customer groups in nature and serve diverse customers coming from different cultures;
- be able to tell customers about nature and culture and to organise meals and other services in cross-country conditions;
- be familiar with the principles of entrepreneurship and marketing;
- be able to follow everyday operations and make proposals to change these in accordance with the principles of sustainable development;
- be able to observe and report on the state of the environment;
- be able to recognise local species of plants and animals and use these to determine the quality of the environment;
- know how to plan remediation and to remediate natural and built-up environments;
- know how to move about and work in an environmentally friendly manner and to equip themselves and camp properly in nature in all seasons;
- be able to take safety and responsibility into account;
- know how to use and service gear and equipment and promote operating methods in line with sustainable development;
- know how to maintain their working and functional capacity;
- be able to function proactively, co-operatively and in a quality-conscious and service-oriented manner;
- know how to draw up the necessary messages and work reports, making use of information technology;
- be able to assume responsibility for their own work, assess their own work performance and develop their vocational skills;
- be able to manage in work-related interactive situations in both national languages and in one foreign language.

*Natural Resources Producers who have completed the qualification shall:*

- *know how to make use of nature in a sustainable manner and gather or cultivate wild plants;*
- *be able to work with businesses and institutions providing forestry, agricultural, food, cottage industry and nature and wellness services;*
- *command product safety, product development, quality management and marketing;*
- *be able to follow everyday operations and make proposals to change these in accordance with the principles of sustainable development;*
- *be able to observe and report on the state of the environment;*
- *be able to recognise local species of plants and animals and use these to determine the quality of the environment;*
- *know how to plan remediation and to remediate natural and built-up environments;*
- *know how to move about and work in an environmentally friendly manner and to equip themselves and camp properly in nature in all seasons;*
- *be able to take safety and responsibility into account;*
- *know how to use and service gear and equipment and promote operating methods in line with sustainable development;*
- *know how to maintain their working and functional capacity;*
- *be able to function proactively, co-operatively and in a quality-conscious and service-oriented manner;*
- *know how to draw up the necessary messages and work reports, making use of information technology;*
- *be able to assume responsibility for their own work, assess their own work performance and develop their vocational skills;*
- *be able to manage in work-related interactive situations in both national languages and in one foreign language.*

*Nature and Environmental Advisors who have completed the qualification shall:*

OFFICIALLY RECOGNISED WAYS OF OBTAINING THE CERTIFICATE

|   |
|---|
| <p><i>By virtue of statutes, the qualification certificate may be obtained in one of three ways:</i></p> <ol style="list-style-type: none"> <li><i>1. The qualification may be completed as upper secondary vocational education and training, where the studies primarily take place at an educational institution. The education and training also include practical studies at the educational institution as well as studies at a workplace with a scope of at least 20 credits. The qualification certificate is awarded by the education provider with an authorisation granted by the Ministry of Education and Culture to provide education and training.</i></li> <li><i>2. The qualification may be completed as a competence-based qualification, where vocational skills are assessed regardless of how they have been acquired. The qualification certificate is awarded by the Qualification Committee appointed by the National Board of Education.</i></li> <li><i>3. The qualification may be completed as apprenticeship training. In this case, 70–80% and 30–20% of studies take place at a workplace and at an educational institution respectively. The student has a fixed-term contract of employment. The qualification certificate is awarded by the education provider or by the Qualification Committee.</i></li> </ol> |
| <p><b>Entry requirements</b></p> <p><i>The syllabus of basic education (primary and lower secondary levels) or a corresponding previous syllabus in curricular upper secondary vocational education and training.<br/>Competence-based qualifications may be completed irrespective of how the vocational skills and competences have been obtained. No formal entry requirements have been specified for those participating in competence tests.</i></p>  |
| <p><b>Additional information</b></p> <p><i>Learning outcomes are assessed nationally by field, either based on samples or covering all students. The Finnish National Board of Education is responsible for national assessments of learning outcomes.<br/>The statutory teaching qualifications required in upper secondary vocational education and training are a higher education degree and pedagogical studies with a scope of 35 credits. In addition, teachers of vocational studies are required to have three years of experience in their teaching field.<br/>More information (including a description of the national qualifications system) is available at: <a href="http://www.oph.fi/info/recognition">www.oph.fi/info/recognition</a>.</i></p>  |
