### Project title: Gerontechnology for Nursing

| Coordinator | The Main objectives of the project are  
1) To enable JU nursing lecturers to gain international experience and enhance their competence on curriculum and e-learning development as part of international gerontological and gerontechnological nursing education.  
2) To enable JU, JAMK and LAMK nursing students and lecturers to gain experience and enhance their competence in gerontechnology including robotics.  
3) To develop an international e-learning module on gerontological and gerontechnological module on nursing for JU, LAMK and JAMK bachelor level students. The purpose of this is to develop their competence in ageing and technology and international competence for future tasks in international nursing profession.  
4) To break first the ice between health care and gerontechnology and especially in the area of robotics, concerning prejudice, ignorance and fear. |
