### Project title: MENTOROB

#### Coordinator

**Jyväskylä University of Applied Sciences**  
School of Health and Social Studies  
Kari Vehmaskoski  
Kari.Vehmaskoski@jamk.fi

The project life cycle is dedicated for the following aims and competences:

1. To develop a mentoring programme for professional practice for third year bachelor level physiotherapy students of JAMK and Takasaki to enhance the development of internationalisation and robotic competences and to support the applicability of the competences in the working life;

2. To enable staff members of JAMK and Takasaki to enhance their knowledge in the area of international robotics to support future curriculum development in social and health care;

3. To enhance the importance of student mentoring in international contexts of Finnish and Japanese health care professionals;

4. To initiate the development of a multidisciplinary mentoring programme in rehabilitation between JAMK and Takasaki autumn 2019 onwards, making use of the developed knowledge through the project activities.

#### Partners

Takasaki University of Health and Welfare
