Combining the strengths of all partners involved the aim is to enhance the presence of working/business life in studies in an international environment. The project aims at the sharing of the pedagogical learning methodology (LbD) between Finland and China. This will lead in to a deeper collaboration from students and staff hence paving ways for future joint curriculum implementations, study modules and joint/dual degrees with our institutions strategic partners. Implementation of this project will also lead to increased opportunities for co-operation between Finnish and Chinese companies leading into increased international business activities in both countries. The HEI’s and other partners involved will act as catalysts in the co-operation between individual companies.
