

# Ukrainians aged 16 to 18, welcome to study!

## WHEN YOU HAVE A MUNICIPALITY OF RESIDENCE:

You will be subject to compulsory education until you turn 18 or have completed a qualification at a general upper secondary school or in vocational education and training, or a corresponding education abroad.

Compulsory education means that you must attend education consistent with the Finnish education system.

You can study free of charge.

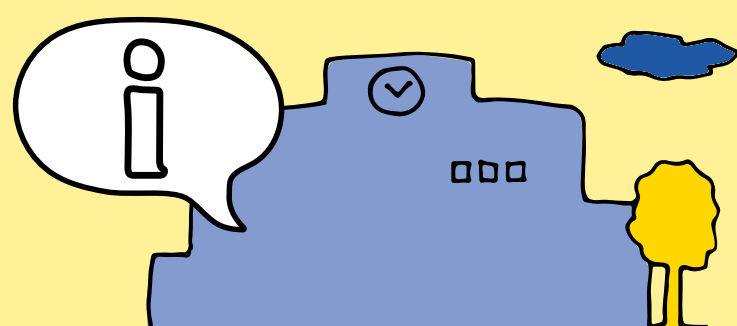

When studying, you get to know people of your own age.

You will get an occupation if you attend vocational education and training, or a general education if you complete general upper secondary education.

Once you have completed one of these qualifications, you can apply for a place in a higher education institution.

Your municipality of residence will give you more information about education and training suitable for you and about applying for a study place.
